

Monthly IT Operations Report

Application-focused operational report covering claims processing availability, application incidents, support tickets, document exchange integrations, and maintenance activities.

Report Period	January 2026	Department	IT Operations
Report ID	ITOPS-MON-2026-01-081	Report Date	03 January 2026
Generated Time	13:39 WIB	Report Status	Final
Primary Application	Meridian Claims Portal	Supporting Server	Cygnus Transaction Node
Supporting System	Polaris Document Exchange System	Reporting Cycle	Monthly

Executive Summary

During January 2026, **Meridian Claims Portal** recorded **99.36%** availability. The application was supported by **Cygnus Transaction Node** at 99.88% uptime and **Polaris Document Exchange System** at 99.79% availability. IT Operations recorded **11 incidents**, with 10 resolved and 1 medium-severity incident remaining open at period close. The support queue received **96 tickets** with **94.7%** SLA compliance. All 6 planned maintenance activities were completed, while one unplanned recovery event required additional service attention.

99.36%	11	96	94.7%
Application Availability	Total Incidents	Application Tickets	SLA Compliance

1. Managed Application & Service Overview

Asset Type	Asset Name	Operational Role	Environment	Status
Application	Meridian Claims Portal	Claims intake, validation, and processing portal	Production	Operational
Server	Cygnus Transaction Node	Transaction processing and application host	Production	Healthy
System	Polaris Document Exchange System	Secure document exchange and delivery	Production	Healthy

2. Application Availability & Performance

Service Component	Target	Actual	Key Observation	Status
Claims Intake	≥ 99.50%	99.48%	Short interruption during peak intake	Near Target
Claims Validation	≥ 99.50%	99.22%	Validation latency increased	Below Target
Claims Processing	≥ 99.50%	99.31%	Queue depth increased temporarily	Below Target
Document Exchange	≥ 99.00%	99.61%	Stable outbound delivery	Met
Overall Application	≥ 99.50%	99.36%	Processing degradation	Below Target

Application Performance Indicators

Indicator	January 2026	Target	Assessment
Average Page Response Time	1.62 sec	≤ 2.00 sec	Met
95th Percentile Response Time	3.48 sec	≤ 4.00 sec	Met
Failed Claim Submissions	1.2%	≤ 1.0%	Needs Review
Validation Success Rate	98.3%	≥ 98.0%	Met
Document Exchange Success Rate	99.4%	≥ 99.0%	Met

3. Application Incident Management

Severity	Total	Resolved	Open	Resolution Rate
Critical	0	0	0	100%
High	3	3	0	100%
Medium	5	4	1	80.0%
Low	3	3	0	100%
Total	11	10	1	90.9%

Incident ID	Date / Time	Component	Category	Impact	Resolution
INC-260102-012	02 Jan 2026, 10:06	Claims Validation	Latency	High	Resolved
INC-260104-019	04 Jan 2026, 14:18	Claims Processing	Queue growth	High	Resolved
INC-260106-027	06 Jan 2026, 09:52	Claims Intake	Availability	High	Resolved
INC-260108-038	08 Jan 2026, 15:31	Document Exchange	Delivery delay	Medium	Resolved
INC-260109-045	09 Jan 2026, 11:43	Claims Processing	Worker error	Medium	Open

4. Application Support / Ticket Management

Metric	January 2026	Target	Status
Total Tickets	96	—	Recorded
Resolved Tickets	91	≥ 90%	Met
Pending Tickets	5	≤ 10%	Met
SLA Compliance	94.7%	≥ 95%	Below Target
First Response within SLA	95.1%	≥ 95%	Met
Average Resolution Time	6h 58m	≤ 8h	Met

Ticket Category Breakdown

Ticket Category	Tickets	Resolved	Pending	Share
Claim Submission	24	23	1	25.0%
Validation / Rules	18	17	1	18.8%
Document Upload	16	15	1	16.7%
User Access	13	12	1	13.5%
Integration / API	15	14	1	15.6%
Reporting / Data	10	10	0	10.4%
Total	96	91	5	100%

5. Maintenance Management

Maintenance Type	Planned	Completed	Downtime	Result
Application Release	2	2	0h 22m	Successful
Database Maintenance	1	1	0h 18m	Successful
Validation Rules Update	1	1	0h 10m	Successful
Document Exchange Maintenance	1	1	0h 08m	Successful
Monitoring Configuration	1	1	0h 06m	Successful
Unplanned Application Recovery	1	1	1h 12m	Completed

Maintenance Activity Log

Date / Time	Component	Activity	Owner	Outcome
02 Jan 2026, 09:15	Meridian Claims Portal	Claims workflow release	App Support	Successful
04 Jan 2026, 13:40	Polaris Document Exchange System	Document exchange maintenance	Platform Team	Successful
06 Jan 2026, 10:20	Meridian Claims Portal	Validation rules update	App Support	Successful
08 Jan 2026, 15:05	Cygnus Transaction Node	Runtime health and resource review	Infrastructure	Successful

Date / Time	Component	Activity	Owner	Outcome
10 Jan 2026, 08:35	Meridian Claims Portal	Processing worker recovery	App Support	Completed

6. Key Highlights & Observations

- Meridian Claims Portal recorded 99.36% availability, slightly below the 99.50% target.
- Claims validation and processing experienced temporary latency and queue growth during higher transaction periods.
- Document exchange remained stable with a 99.4% successful delivery rate.
- Application support handled 96 tickets with 94.7% SLA compliance.
- One medium-severity processing-worker incident remained open at period close.
- All six planned maintenance activities were completed successfully.

7. Recommended Actions

Priority	Action	Owner	Target
High	Investigate claims-processing worker errors and review queue scaling thresholds	App Support	14 Jan 2026
High	Review validation-service latency during peak claim submission periods.	App Support	16 Jan 2026
Medium	Analyze failed claim submissions and improve validation error handling.	Application Team	21 Jan 2026
Low	Continue monitoring document exchange delivery performance and retry behavior	Platform Team	Monthly

8. Structured Extraction Reference

Stable field labels are intentionally included to support controlled PDF extraction, preview validation, and tracker ingestion.
